

ROSA

Rosa is a Belgian company shaping the future of healthcare by helping patients locate health professionals per country or postal code.

Dedicated success manager

to get the most value out of the data

Improved patient experience

with multi-language features

Increased accuracy

in their address matching

All the postal code data you need, updated weekly.

Try our data

Leverage multi-language data for address matching

“GeoPostcodes is the most accurate data provider we’ve worked with. Thanks to them, Rosa can provide the user experience patients deserve.”

ANTOINE PAIRET
CTO and Co-founder of Rosa

Challenge

Accurate data becomes essential when matching patients to healthcare professionals in a given perimeter. Open sources provided inaccurate data: missing postcodes, bad translations, and wrong coordinates.

Solution

GeoPostcodes addresses the needs of Rosa’s internal teams and users. The developers value the quality and the ease of use of the data. Their users value its accuracy, its completeness, and its multi-language features.

Results

GeoPostcodes’ data improved the user experience on Rosa’s website and helped generate more accurate address matches based on city coordinates.
